

EACC Adult Education/Literacy program is helping students “RACE to SUCCESS” this school year.

EACC Adult Education/Literacy program is collaborating with Commercial Truck Driving and Certified Nursing Assistant programs at East Arkansas Community College to provide our community with fast passed training programs so they may enter the workforce quickly. Normally these students are non-traditional students who have not been in an educational setting for several years and show a significant deficiency in basic skills. The Adult Education/Literacy program helps students increase reading and comprehension skills along with preparing them for the college setting. Also integrated into their Adult Education/Literacy class is job training and workforce preparation.

Currently within the 2021-2022 program year, thirty-three (33) students have made academic level improvements. These improvements are the first steps towards their chosen career. Of the 33 students, 19 students have received their CDL License and are working in their chosen career field. The other 14 students are in classes or waiting for the next classes to begin.

The EACC Adult/Education/Literacy program is extremely proud to be part of preparing students to fill the labor shortage in both the medical and transportation fields.
